

INDEX TO VOLUME XXIV

- Adirondack Mountains, igneous rock analyses of the, 253-4, 257.
Airdrie, fossil beetles, 279-86.
Algal breccia-conglomeratic limestone, 14-8.
Anderson, J. G. C., on Some Aspects of the Geology of Scandinavia and Spitzbergen (abstract of lecture), 301.
Antrim, 294; structure of, 98-9; erosion levels of, 101-5.
Appin phyllites of Ballachulish area, 241-3.
Arran, 41, 48, 52-4, 74-6, 91, 93, 97, 103.
Auchalton quarry, 141, 146-7.
Ayrshire, magnetic survey, 154-68; Upper Old Red Sandstone of, 138-53.
- Bailey, E. B., 116.
Ballachulish granite, a possible extension of, 239-47.
Ballantrae, pillow lavas at, 19-26.
Banding in basic igneous rocks of Skye, 190-2.
Barite in cornstone, 143, 144.
Beetle fragments, from Girvan, 270; from Airdrie, 279-86.
Begg, J. L., obituary, 108-10.
Bishop, W. W., on Former Landscapes in Southern Africa (abstract of lecture), 298-9.
Bloxham, T. W., on Pillow-structure in Spilitic Lavas, 19-25.
Boulder clay, near Airdrie, 279; at Ravenscraig, 11.
Bowes, D. R., on The Petrochemistry of some rocks from North Rona, 184-9; on A Possible Extension of the Ballachulish Granite, 239-47.
Brachiopods, in the Silurian, 27-31.
Burgess, I. C., on Fossil Soils of the Upper Old Red Sandstone of South Ayrshire, 138-53.
Buried river channel, of the Devon, 1-7; at Ravenscraig, 10-12.
Burntisland, limestone in Oil-shale Group, 14-18.
- Cadell, H. M., interpretation of the Devon buried channel, 1, 2, 3.
Calciferous Sandstone Series, 287-9.
Calcite, replacement by silica, 151.
Caledonian folding, 299.
Carboniferous, of the East Glasgow area, 213-37.
— and Permian igneous rocks, analyses of, 257.
Cardowan district, bores of the, 222-6.
Centenary Celebrations, excursions, 115; exhibition, 114; lectures, 112-3; report by Secretary, 113-5.
Chemical analyses, 132, 188-9, 211, 244-5. *See also* Fraser, W. E.
Chronic, J., on The Geology of Colorado (abstract of lecture), 119.
Clays, at Ravenscraig, 8-11.
Climatic conditions from fossil beetles, 283, 285.
Clyde Plateau Lavas, estimate of thickness, 161-4.
Colorado Plateau, 119, 298-9.
Colvilles, geology of site at Ravenscraig, 8-13.
Composition diagram for comparison purposes, 248-57; cumulative 258-61.
Constitutional amendments, 112, 295, 297.
Coope, G. R., on Coleoptera from a Peat interbedded between two Boulder Clays at Burnhead, near Airdrie, 279-86.

- Cornstones, 138-53.
 Cornwall and Devon, igneous rock analyses of, 256.
 Craig, G. Y., on The Geology of the Colorado Plateau (abstract of lecture), 297-8.
 Craigdullyear quarry, 141-6, 149.
 Craighead Inlier, Silurian succession of, 27-31.
 Crinanite, 121, 125-7, 131-3.
 Cummings, R. H., on The Geology of the Ravenscraig district, Motherwell, 8-13.
 Cuillin, basic igneous rocks of the Southern, 190-212.
 Daly's averages of igneous rock compositions, 251, 253, 257, 260-1.
 Devon valley, sub-drift surface of, 1-7.
 Differentiation of basic magma in Islay—Jura area, 127-9-135-6.
 Dusk Water Fault, a vertical force magnetic survey over part of, 154-68.
 Dykes swarms, displacement by Great Glen Fault, 111.
 Elder, S., on Methods of Underground Stratigraphical Correlation (abstract of lecture), 296.
 Eucrite, 203-4.
 Feldspar, habit of, 193-4; clouding of, 207-8.
 Felspathisation of amphibolites in North Rona, 182-3, 187-9.
 Fife, limestone at Burntisland, 14-8.
 Flett, W. R., elected President, 116; on A Trip to Antarctica (abstract of lecture), 117; on The Impact of Engineering on Geology, 299.
 Flora, from Ravenscraig, 13.
 Foraminifera, 272, 274-6.
 Forsyth, I. H., on The Succession between Plean No. 1 Limestone and No. 2 Marine Band in the Carboniferous of the East Glasgow Area, 213-34; on Two Occurrences of Non-Marine Lamellibranchs in the Coal Measures of the Provanmill District, Glasgow, 235-7.
 Francis, E. H., comments on the paper by J. M. Soons, 6-7.
 Fraser, W. E., on A Chemical Composition Diagram for Comparison Purposes, 248-57; on A Cumulative Chemical Composition Diagram, 258-61.
 Freshney, E. C., on An Extension of the Silurian Succession in the Craighead Inlier, Girvan, 27-31.
 Garabal Hill, rock analyses of, 256.
 Garngad district, exposures, 226-9; fossils from railway cutting, 227, 232-3.
 George, T. N., on The Stratigraphical Evolution of the Midland Valley, 32-107.
 Girvan, Post-glacial sediments, 262-78.
 Girvan Water, 147-8.
 Gneisses of North Rona, origin of, 180-9.
 Gravels at Ravenscraig, 12.
 Great Glen Fault, 111.
 Greensmith, J. T., on Algal breccia-conglomeratic Limestone in the Oil-Shale Group, Burntisland, Fife, 14-18.

- Highland Boundary Fault, 34, 37, 65-6; initiation of, 40-3; in Lower Old Red Sandstone times, 48-50; in Middle Old Red Sandstone times, 65-6; in Tournaisian times, 70; in Hercynian times, 87-9; in Ireland, 38, 41, 48, 50, 71-3, 84, 88-9, 95; in Kintyre, 48-9, 55, 70; at Lomondside, 56-7, 87; in the Inverkip gap, 58; variability of throw, 88.
- Highlands, igneous rock analyses of the, 252-4, 256.
- Holgate, N., on Tertiary Movements of the Great Glen Fault (abstract of lecture), 111.
- Inchgotrick Fault, 80, 86, 91.
- Islay—Jura dyke swarm, 121-37.
- Jardine, W. G., on Post-Glacial Sediments at Girvan, Ayrshire, 262-78.
- Johnstone, G. S., on A Geological Journey in the Highlands and Islands (abstract of lecture), 112.
- Kintyre, 48-9, 54-6, 70, 73-4.
- Knollhead, inferred volcanic vent at, 164-6.
- Lake District, 301; igneous rock analyses of the, 257.
- Lamellibranchs in the Coal Measures of the Provanmill district, 235-7.
- Lele, K. M., and D. Provan, on A Mississippian Spore Assemblage from Ayrshire, 287-9.
- Lepidodendron stump at Ravenscraig, 12-3.
- Longhill Point, 287-9.
- Llandoveryan of Craighead, 27-31.
- McKerrow, W. S., on The Chronology of Caledonian Folding in the British Isles (abstract of lecture), 299.
- Magnetic survey over part of the Dusk Water fault of North Ayrshire, 154-68.
- Midland Valley of Scotland, stratigraphical evolution of, 32-107; development of present form, 99-105; river system of, 100.
- Mississippian spore assemblage, 287-9.
- Mitchell, G. H., on Geological Jaunts in Cumbria (abstract of lecture), 301.
- Nicol, J. S., obituary, 110.
- Nisbet, H. C., on The Geology of North Rona, 169-84.
- North Rona, geology of, 169-84; petrochemistry of, 184-90.
- Northern Highlands, igneous rock analyses of the, 256.
- Obituary notices: J. L. Begg, 108-10; J. S. Nicol, 110; G. W. Tyrrell, 290-2; J. M. Wordie, 292-3.
- Ochils, oversteepening of, 5.
- Old Red Sandstone: of South Ayrshire, 138-53; analyses of lavas, 257.
- Ooliths in limestone, 17, 143, 147, 149.
- Ortonella* in limestone, 17-8.
- Ostracods in Post-glacial sediments, 274, 276.
- Park, R. G., on A Vertical Force Magnetic Survey over part of the Dusk Water fault of North Ayrshire, 154-68.

- Patterson, E. M., on The Rocks and Scenery of the Antrim Coast (abstract of lecture), 294.
- Pentland Hills, structure of, 58-62.
- Phemister, J., elected President, 300.
- Pillow-structure in spilites at Ballantrae, 19-25; general form, 21-4; way-up criteria, 21; origin of, 24-5.
- Plean limestones and marine bands, 213-34.
- Post-glacial sediments at Girvan, 262-78.
- Presidential addresses. *See under* George, T. N., Flett, W. R.
- Provan, D. *See under* Lele.
- Provanmill district, occurrence of non-marine lamellibranchs in the, 235-7.
- Pyrrhotine, 240.
- Queenslie district, bores of the, 215, 219-22.
- Raised beaches at Girvan, 265-6.
- Ravenscraig district, note on the geology of, 8-12.
- Roman cement, 217-8, 221, 229-30.
- province, igneous rock analyses of the, 253, 257.
- Scotland, igneous rock analyses of the north-eastern part of, 256.
- Sedimentary structures: in algal limestone, 15-7; in cornstone, 140-51.
- variation across the Dusk Water Fault, 159.
- Seismic surveys at Ravenscraig, 10.
- Serpentine, 38, 43, 65.
- Silurian succession: in the Craighead Inlier, 27-31; in Northern Ireland, 44-6; in Scotland, 45-7.
- Skye. *See under* Cuillin.
- Soils, fossil, 138-53.
- Soons, J. M., on The Sub-Drift Surface of the Lower Devon Valley, 1-7.
- South Calder Water, 8.
- Southern Upland Fault, 34, 37, 39, 60-1, 66; initiation of, 45-6, 51-2, 66; in Carboniferous times, 79-83; in Hercynian times 89-90; in Ireland, 39, 46, 51, 83-6; variable movement of, 81-2, 85-6, 89-90.
- Southern Uplands massif, 79-81, 83, 85, 92, 97, 100-3.
- Spitzbergen, 301.
- Spores from Ayrshire, 287-9.
- Straiton Fault, 39, 45, 62-3.
- Tertiary volcanic rocks, analyses of, 257.
- Trilobites in the Silurian of Craighead, 27-9.
- Tyrrell, G. W., obituary, 290-2.
- Ultrabasic blocks within gabbro, 198-200.
- Walker, F., on The Geology and Scenery of Cape Province (abstract of lecture), 118, on The Islay—Jura dyke swarm, 121-37.
- Weedon, D. S., on the Basic Igneous Rocks of the Southern Cuillin, 190-212.
- Welsh geosyncline, igneous rock analyses of the, 257.
- Wordie, J. M., obituary, 292-3.
- Würm interstadial, 285.
