# CONTENTS—Volume XIX, Part III.

## PAPERS.

| XIII. | Rhu (Row) Point—A Readvance Moraine. By W. J. McCallien, D.Sc. | 385 |
| XIV. | The Carbonicola Fauna of the Midlothian Fifteen Foot Coal: a Study in Variation. By D. Leitch, B.Sc. | 390 |
| XV. | The Basal Fauna of the Zone of Anthracomya modolaris in the Coal Measures of South Ayrshire. By D. Leitch, B.Sc. | 404 |
| XVI. | A Note on the Orientation of Cone-shaped Meteorites. By W. J. McCallien, D.Sc. | 409 |
| XVII. | The Fauna of Skipsey’s Marine Band. By Ethel D. Currie, B.Sc., Ph.D., F.G.S., Catherine Duncan, M.A. (Mrs. McCallien) and Helen M. Muir-Wood, D.Sc., F.G.S. | 413 |
| XVIII. | The Cause and Mechanism of Igneous Intrusion: with some Scottish Examples. By R. W. van Bemmelen (Bandoeng, Java) | 453 |
| XIX. | Obituary Notices: J. W. Gregory; R. McMillan; R. W. Dron; W. Mackie. | 493 |

Abstract of Proceedings for 1931 (12th March) to 1936 (9th April) | 500 |
Abstract of the Treasurer's Accounts for 1931 to 1936 | 515 |
Index to Volume XIX | 528 |
Plate I.—Diagram showing the intergrades of the variable community of *Carbonicola communis* from above the Midlothian Fifteen Foot Coal .. 400

Plates II-IV.—Fauna of Skipsey’s Marine Band .. 452

Plate V.—Ideal evolution of a single undation impulse, excluding all complicating factors .. .. 463

VI.—Tectonics and major intrusions about the Mull igneous centres .. .. .. .. 487

(Plate VI is reproduced from J. E. Richey, *Trans. Geol. Soc. Glasgow*, vol. xix, part i, 1932, Plate III. The photographs for Plates II-IV were taken by Messrs. D. M. Filshill and A. Ferguson).

FIGURES IN TEXT.

**PAPER XII.**

Fig. 1.—Map of the Inverbeg-Rowardennan Dyke, with inset (on same scale) showing the Inversnaid Sheets .. .. .. .. .. .. 375

**PAPER XIII.**

Fig. 1.—Index-map of Rhu (Row) Point .. .. .. 385

2.—Section at high-water mark on the N.W. side of Rhu Point showing 25-foot gravels resting unconformably on morainic material (current bedded sands and gravels, and clays) .. 387

3.—Map of the Firth of Clyde District showing the ‘Position of the Latest Glaciers’ according to James Anderson (see *Trans. Geol. Soc. Glasgow*, vol. x, part ii, 1896, Plate IV) .. .. 389

**PAPER XIV.**

Fig. 1.—Graphs illustrating variation within the Midlothian Fifteen Foot Coal assemblage .. 395

2.—Diagram illustrating parallelism in variation in the Bassy Mine and Fifteen Foot faunas .. 399
ILLUSTRATIONS

PAPER XV.

Fig. 1.—Section of part of the Productive Coal Measures in Auldnaw Glen, near Dalmellington 405

,, 2.—Carbonicola, Anthracomya and Naiadites from the Zone of A. modiolaris in Auldnaw Glen 407

PAPER XVI.

Fig. 1.—Diagram illustrating Farrington's theory of the formation of a conical meteorite (after Farrington) 410

,, 2.—Outline of the Boogaldi Meteorite 410

PAPER XVII.

Fig. 1.—Map showing localities for fossils from Skipsey's Marine Band 418

,, 2.—Homoceratoides jacksoni. Suture-line 439

,, 3.—Schuichengoceras yohi. Suture-line 439

,, 4.—Anthracoceras hindi. Suture-line at 22 mm. diameter of paratype 439

,, 5.—Anthracoceras hindi. Suture-line at 8 mm. diameter of paratype 439

,, 6.—Anthracoceras hindi. Suture-line at 2 mm. diameter of specimen from West Fife 439

,, 7.—Gastrioceras suborientale. Suture-line 439

,, 8.—Gastrioceras welleri. Suture-line 439

,, 9.—Dictyoclostus craigmakensis sp. nov. 445

PAPER XVIII.

Fig. 1.—Diagrammatic representation of the stresses set up in the hanging wall of a cone fracture 471

,, 2.—Sections across the Vredefort and Arran Domes 473

,, 3.—Diagrammatic section across the South-eastern Mull centre during the first general updoming 474

,, 4.—Plan and section of the Bandoeng Dome (Java) and the arc of folding at its northern foot 476

,, 5.—Ideal Complex of Ring-dikes and Cone-sheets in plan and section 477
